Abstracts

Global egg replacement ingredients market is expected to grow at a CAGR of 5.7% from 2017 to 2022 to reach USD 1,152.0 million by 2022. This growth is majorly accounted to the growing preference for plant based natural ingredients among the general population, growing vegan, vegetarian, and flexitarian population; frequent outbreaks of Avian Influenza; and safety benefits over natural eggs. However, there is reluctance to use the egg replacement ingredients from both the industrial users as well as the end consumer mainly due to its inability to replicate the exact flavor, taste, and texture like the real eggs.
