Industrial Control Systems Security Market Offering, Security Type (Network Security, Cloud Security), Organization Size, Application (Identity & Access Management, Firewalls), End-use Industry (Energy & Utilities, FMCG) and Geography — Global Forecasts to 2030

The research report titled, “Industrial Control Systems Security Market Offering, Security Type (Network Security, Cloud Security), Organization Size, Application (Identity & Access Management, Firewalls), End-use Industry (Energy & Utilities, FMCG) and Geography — Global Forecasts to 2030”, provides in-depth analysis of industrial control systems security market across five major geographies and emphasizes on the current market trends, market sizes, market shares, recent developments, and forecasts till 2030.

The global industrial control systems security market is expected to reach \$30.2 billion by 2030, growing at a CAGR of 10.1% during the forecast period of 2023–2030.

The growth of this market is attributed to government initiatives and regulations supporting the adoption of ICS security solutions and increasing automation in manufacturing industries. In addition, the increasing adoption of Industry 4.0 and smart manufacturing technologies and the growing demand for robotic process automation systems is expected to offer significant growth opportunities for the growth of this market. However, the high capital expenditure required for ICS security deployment

restrains the growth of this market up to a certain extent.

Based on offering, the market is segmented into hardware, software, and services. In 2023, the services segment is expected to account for the largest share of the global industrial control systems security market. However, the software segment is projected to register the highest CAGR during the forecast period. The growth of this segment is driven by the increasing concerns regarding data security and privacy and industrial enterprises' consistent efforts to improve efficiencies, reduce costs, and increase security.

Based on organization size, the market is segmented into large enterprises and small and medium-sized enterprises. In 2023, the large enterprises segment is expected to account for the larger share of the global industrial control systems security market. However, rising awareness regarding the significance of ICS security among small and medium-sized enterprises is expected to boost the growth of the small and medium-sized enterprises segment at a higher CAGR during the forecast period.

Based on application, the market is segmented into data loss prevention, unified threat management, encryption, identity & access management, risk & compliance management, antivirus/anti-malware, intrusion detection/prevention, distributed denial of service (DDoS) mitigation, security & vulnerability management, security configuration management, security information & event management (SIEM), whitelisting, firewalls, and other applications. In 2023, the identity & access management segment is expected to account for the largest share of the global industrial control systems security market. However, the risk & compliance management segment is projected to register the highest CAGR during the forecast period. The growth of this segment is driven by the increasing penetration of industrial control systems and the rising adoption of eGRC solutions to optimize risk management and minimize fraud.

Based on end-use industry, the market is segmented into automotive, electronics & electrical, FMCG, heavy metals & machinery, energy & utilities, transportation, and other industries. In 2023, the energy & utilities segment is expected to account for the largest share of the global industrial control systems security market. However, the FMCG segment is expected to record the highest CAGR during the forecast period. The growth of this segment is driven by the adoption of advanced technologies in the FMCG market due to frequent changes in consumer preferences and increasing data breaches in FMCG companies.

#### Geographic Review:

Based on geography, the market is broadly segmented into North America, Europe, Asia-Pacific, Latin America, and the Middle East and Africa region. In 2023, North America is expected to account for the largest share of the global industrial control systems security market. However, Asia-Pacific is projected to register the highest CAGR during the forecast period. The growth of this market is attributed to the advent of Industry 4.0 and increasing cyberattacks in the industrial sector.
