Abstracts

The structure of the Latin American population is undergoing significant change. The United Nations projects that the share of Latin America's population that is aged 65 or over will triple by mid-century, from 6.3 percent in 2005 to 18.5 percent in 2050. Also, several Latin American countries, including Brazil, Chile, and Mexico, may have older populations than the United States in near future. Decreasing fertility rates, coupled with increasing overall life expectancy, cited to success in combating infectious diseases fueled much of the increase in life expectancy over the last six decades in this region. As a result, demand for elderly care is expected to rise significantly. This geriatric population base is highly susceptible to various diseases such as diabetes, blood pressure, sleep apnea, arthritis, and cardiovascular. Therefore, the growing global geriatric population base coupled with the fact that approximately 70% of home health patients belong to the age group of 65 years and above, is expected to drive market demand for home healthcare products and services during the forecast period.

In addition, growing shift towards the home care due to rising awareness regarding the convenience and cost-effectiveness of home healthcare products & services further contributing to the growth of this market. Technological advancements such as tele-health, wearable devices, mobile health applications etc. and government initiatives to promote home healthcare are also fueling the growth of home healthcare market in this region.

Latin American home healthcare market is mainly segmented into products, and services. The home healthcare products market is primarily segmented into home tests and patient monitoring equipment which includes fertility tests & aids, pregnancy tests, gender, DNA & parental tests, drug tests, alcohol tests, cholesterol tests, HIV tests, holter monitors, blood pressure monitors, oximeters, heart rate monitors, thermometers,
