Pet Food Ingredients Market by Type (Meat & Poultry, Fish, Cereals & Grains {Maize, Wheat}, Additives, Novel Ingredients), Application (Pet Meals {Dry, Wet Meal}, Treats & Snacks, Veterinary Diets), Pet Type (Dog, Cat, Birds)—Global Forecast to 2031

According to the research report titled 'Pet Food Ingredients Market by Type (Meat & Poultry, Fish, Cereals & Grains {Maize, Wheat}, Additives, Novel Ingredients), Application (Pet Meals {Dry, Wet Meal}, Treats & Snacks, Veterinary Diets), Pet Type (Dog, Cat, Birds)—Global Forecast to 2031,' the pet food ingredients market is projected to reach \$73.30 billion by 2031, at a CAGR of 8.5% from 2024 to 2031. In terms of volume, the pet food ingredients market is projected to reach 63,537.9 thousand tons by 2031, at a CAGR of 8.4% during the forecast period of 2024–2031. The report provides an in-depth analysis of the pet food ingredients market across five major geographies, current market trends, size, and recent developments, and the forecast for 2031.

Succeeding extensive secondary and primary research and an in-depth analysis of the market scenario, the report conducts the impact analysis of the key industry drivers, restraints, opportunities, and challenges.

The growth of the pet food ingredients market is driven by the rising pet population coupled with increasing expenditure on pet food, the growing demand for premium pet food, and an increasing focus on pet health and wellness. However, the stringent regulatory structures and fluctuating raw material prices restrain the growth of this

market.

Furthermore, the increasing availability and growing acceptance of novel pet food ingredients and the proliferation of direct-to-consumer (D2C) brands and start-ups in the pet food category are expected to generate growth opportunities for the stakeholders in this market. However, the risk of counterfeit products is a major challenge impacting the growth of the pet food ingredients market.

Moreover, the rising demand for customized pet food is a prominent trend in the pet food ingredients market.

Key Players

The key players operating in the global pet food ingredients market are Cargill, Incorporated (U.S.), Ingredion Incorporated (U.S.), Darling Ingredients Inc. (U.S.), Kemin Industries, Inc. (U.S.), Archer-Daniels-Midland Company (U.S.), Omega Protein Corporation (U.S.), Roquette Frères (France), BASF SE (Germany), Protix B.V. (Netherlands), Duynie Ingredients (Netherlands), Chr. Hansen Holding A/S (Denmark), DSM-Firmenich AG (Switzerland), Symrise AG (Germany), IQI b.v. (Netherlands), and KAGOME Australia Pty Ltd (Australia).

Based on type, the global pet food ingredients market is segmented into animal-based ingredients, plant-based ingredients, additives, and novel ingredients. The novel ingredients segment is projected to register the highest CAGR during the forecast period of 2024–2031 due to the growing acceptance of novel ingredients in pet foods, their easy availability, and health benefits. Moreover, the fast growth of this market is further supported by a growing number of novel food ingredient manufacturers, increasing R&D investments from pet food ingredients manufacturers to develop novel ingredients, rising demand for premium pet food products, and growing consumer interest in sustainable pet food sources.

Based on application, the global pet food ingredients market is segmented into pet meals, treats & snacks, veterinary diets, and other applications. In 2024, the pet meals segment is expected to account for the largest share of the global pet food ingredients market. The large market share of this segment is attributed to the increasing demand for convenient and nutritionally balanced pet meals catering to the specific dietary needs of pets. Moreover, the cost-effectiveness, ease of storage, and high energy content of pet meals, the increased spending on premium meals, and the growing demand for customized meals also contribute to the segment's large market share.

Further, the pet meals application is segmented into dry meals and wet meals.

Based on pet type, the global pet food ingredients market is segmented into dogs, cats, birds, ornamental fish, and other pet animals. In 2024, the ornamental fish segment is projected to register the highest CAGR during the forecast period of 2024–2031 due to the rising disposable incomes and growing consumer interest in aquarium fish, growing awareness of the therapeutic benefits of keeping fish, the hospitality sector's demand for ornamental fish to enhance aesthetics, and rising adoption and ownership of ornamental fish.

An in-depth geographic analysis of the industry provides detailed qualitative and quantitative insights into the five major geographies (Asia-Pacific, Europe, North America, Latin America, and the Middle East & Africa) and the coverage of major countries in each region. Latin America is expected to witness significant growth during the forecast period of 2024–2031, mainly driven by the rising awareness about pet health and nutrition, increasing spending on pet food products, increase in per capita disposable income and rapid urbanization, and rising trend of nuclear families. Moreover, in Latin America, Brazil is slated to register the highest CAGR during the forecast period of 2024–2031.
