## Abstracts

Since the rollout of commercial 5G services in October 2019, the combined number of 5G subscribers of China's top three telecoms has reached 420 million in April 2021. In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries. This report analyzes the top three Chinese telecoms' strategies and current development in 5G and finds out the plans of the Chinese government and telecoms for the next stage after 2021.
