Abstracts

The applications of IoT (Internet of Things) technology in the industrial sector have been seen as a huge opportunity for 5G-related hardware ecosystems. However, compared with the current mainstream technologies used for industrial IoT such as industrial Ethernet, 5G is not particularly appealing to enterprises in the short run. This report examines the advantages of 5G technology in the industrial IoT, compares it with the current industrial IoT technologies, and examines the IoT product strategies of Qualcomm and Huawei in the era of 5G.

Contents

1. USE OF 5G IN INDUSTRIAL IOT

1.1 5G Industrial IoT Applications

2. DEVELOPMENT OF INDUSTRIAL IOT TECHNOLOGY

2.1 Industrial IoT Mainstream Standards

2.2 Integration of 5G and Current Communications Standards

3. DEVELOPMENT OF GLOBAL CHIPMAKERS IN INDUSTRIAL IOT

3.1 Qualcomm

3.2 Huawei

4 . MIC PERSPECTIVE

APPENDIX

List Of Tables

LIST OF TABLES

Table 1 Communications Requirements for Industrial Automation

Table 2 Huawei's Deployment in Industrial IoT

List Of Figures

LIST OF FIGURES

Figure 1 5G Applications in the Industrial IoT Sector

Figure 2 Qualcomm's Ideas for 5G Industrial IoT

Figure 3 Huawei EC-IoT

I would like to order

Product name: Development of 5G Industrial IoT and Global Chipmakers' Product Strategies (Pre-order)

Product link: <https://marketpublishers.com/r/DD6A7B011FAEN.html>

Price: US\$ 1,260.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
