Abstracts

Over the years, with the PC technology growing into popularity and maturity, the convergence of AI (Artificial Intelligence) and IoT (Internet of Things), collectively called AIoT (Artificial Intelligence of Things), has become the next area of focus. With an increasing number of IoT applications adopted in people's everyday lives, individual industries have been connecting physical and virtual space using IoT technology while using sensors to acquire data. The acquired data is then computed and processed further using AI chips to ensure better and faster operations. This report provides an overview of AI chips in support of IoT, looks into deployment strategies of leading companies such as Intel, NVidia, MediaTek, and Qualcomm, and their solutions, as well as major players of Taiwan's semiconductor industry in AIoT; examines future trends of AIoT chips.

Contents

1. DEVELOPMENT OF AIOT

- 1.1 Scenario Analysis Strengthened to Improve UX
- 1.2 AIoT Increases the Demand for Edging Computer

2. DEPLOYMENT STRATEGIES OF MAJOR AIOT CHIPMAKERS

- 2.1 Intel
 - 2.1.1 Hybrid Processor Architecture to Compensate the Disadvantage of CPU Parallel Computing
- 2.2 NVidia
- 2.3 MediaTek
- 2.4 Qualcomm

3. DEPLOYMENT STRATEGIES OF TAIWAN'S SEMICONDCUTOR INDUSTRY IN AIOT

- 3.1 AI on Chip Taiwan Alliance Established in Response to AIoT Trends

4. MIC PERSPECTIVE

APPENDIX

I would like to order

Product name: Development of AIoT Chips and Leading Companies (pre-order)

Product link: <https://marketpublishers.com/r/DD6E9AE030D1EN.html>

Price: US\$ 1,400.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/DD6E9AE030D1EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
