Abstracts

The COVID-19 outbreak has had a huge impact on the information industry worldwide as it has successively affected both supply and demand sides. This has plunged the global economy into recession. Despite the hardest hits on the economy, production value of the global IT hardware industry has been benefited from the increasing stay-at-home demand since 2020 amid the pandemic, except desktop computers. Among them, notebook computers performed the best and desktop computers the worse. This report provides an overview of the development of the global and Taiwan IT hardware industry and industry sectors, including desktop computing, notebook computer, server, and motherboard; examines highlighted topics and future development trends of the industry.
