## Abstracts

The global agricultural drone is regarded as the main driving force for the growth of the commercial drone market in the future. It is estimated that the market value will reach US\$1.49 billion by 2023, and the CAGR (Compound Annual Growth Rate) is 18.5%. Observing the development of the global agricultural drone in recent years, it has found that agricultural drones are moving downstream to integrate with software analysis and platform service providers. That is, agricultural drones are no longer limited to hardware. Instead, they are bundled with analysis software to upgrade to agricultural solutions. And agricultural drones' sales model can be divided into two categories: buffet and package. This report analyzes the development of the global agricultural drone market and brands' layout of agricultural drones in the past three years.
