## Abstracts

Due to several detrimental factors, the global motherboard market in 2023 was approximately 75.4 million units, with a year-on-year decline of 10.7%. Shipments are expected to grow by 3.9% year-on-year in 2024, reaching 78.4 million units. This growth is attributed to the increase in commercial and consumer spending, albeit modest, as inflationary pressures have improved compared to 2022 and 2023. This report provides a global motherboard shipment volume forecast for the period 2024-2028 and 3Q24-4Q24, shipment volume by region, and global motherboard/desktop PC shipment volume share forecast for the period 2024-2028, along with key trends observed.
