Date: November 2019

Pages: 21

Price: US\$ 1,800.00 (Single User License)

ID: JF8A5F434942EN

## Abstracts

5G rollout requires the deployment of a large number of base stations in a high-density pattern, leading to increased construction and operating costs. If telecoms construct their base stations on their own, like what they have done in the 2G/3G/4G era, the development of 5G networks may be encumbered with problems such as high construction costs, site locations, and residents' resistance. As a result, joint construction and sharing of 5G base stations has become increasingly important. In China, Japan, and Korea, the three countries that have taken the lead in 5G development in Asia, the governments have encouraged the joint construction and sharing of 5G infrastructure. This report outlines joint construction and sharing of 5G infrastructure led by the government, and the commercialization progress of 5G networks shared in these countries.

## Contents

### **1. SHARING OF 5G INFRASTRUCTURE LED BY GOVERNMENT**

1.1 Korea's Ministry of Science and ICT Urges Top 3 Telecoms to Jointly Build and Share 5G Networks

1.2 Chinese Governments at All Levels Push Hard on Joint Construction and Sharing of Telecommunications Infrastructure

1.3 Japan's Ministry of Internal Affairs and Communications Encourages Sharing of Mobile Communications Infrastructure

### **2. STATUS OF JOINT CONSTRUCTION AND SHARING OF 5G NETWORKS IN ASIA**

2.1 Korea

2.2 China

2.3 Japan

2.4 Summary

### **3. MIC PERSPECTIVE**

Appendix

Glossary of Terms

List of Companies

## List Of Figures

### LIST OF FIGURES

Figure 1 Base Station Infrastructure Required by Korea's Top 3 Telecoms

Figure 2 Scope of Infrastructure Sharing Defined by Japanese Government

Figure 3 Joint Construction of Infrastructure by Korea's Top Three Telecoms

Figure 4 China Tower's Base Station Site Rental Services

Figure 5 5G Base Stations of KDDI, Softbank, and Rakuten Mobile on Tokyo Electric Power Company's Utility Poles

Figure 6 JTOWER's Existing Mobile Network Infrastructure Sharing Solutions and Future Outdoor Sharing Solutions

Figure 7 Types of Infrastructure Sharing among Mobile Network Operators

Figure 8 Types of Infrastructure Sharing among Korea, Japanese, and Chinese Mobile Telecoms

## I would like to order

Product name: Joint Construction and Sharing of 5G Telecom Infrastructure in Asia

Product link: <https://marketpublishers.com/r/JF8A5F434942EN.html>

Price: US\$ 1,800.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
