Abstracts

The ramifications of the US National Defense Authorization Act (NDAA) are becoming increasingly evident. Additionally, cloud computing, the Internet of Things (IoT), and artificial intelligence (AI) are gradually being adopted in intelligent video surveillance solutions, fueling a fresh wave of growth in the industry. Taiwanese companies specializing in video surveillance are starting to identify more lucrative prospects. However, market standards and policy emphases differ across nations. For manufacturers, navigating and complying with the specific regulations governing product sales in these markets should be a top priority. This report provides an overview of the development of the intelligent video surveillance market worldwide, analyzes several key video surveillance standards, and examines the development of intelligent video surveillance policies in major countries, including China, the United States, and Europe.
