Abstracts

The COVID-19 pandemic has brought new normal to our lifestyles, promoting the demand growth in the IT industry. While notebook PCs have witnessed the highest growth since 2020, the U.S-China trade war has disrupted capacity of the global IT industry. Coupled with the pandemic that affects the supply chain, the chip supply crunch has continued to be a pressing issue to affect the industry's shipments. This report provides an overview of upcoming global IT industry trends, analyses the causes of the chip shortage, and a holistic evaluation of three major new changes in the global IT industry amid the chip supply crunch.
