## **Abstracts**

In recent years, the global industrial ecosystem has faced formidable challenges, such as the US-China trade war, the COVID-19 pandemic, the Ukraine-Russia conflict, and climate change, intensifying the risks of supply chain disruption. In the post-pandemic era, global enterprises are shifting their focus from large-scale, low-cost supply chain models to enhancing supply chain resilience capabilities. This report conducts a thorough analysis of strategic opportunities for supply chain transformation in response to global risks, utilizing Taiwan as a case study. It also examines solutions and resources that information service providers can adopt to meet the escalating demand from enterprises for enhanced supply chain resilience.
