Abstracts

As the trend of diversifying global semiconductor supply chains becomes increasingly prominent, Southeast Asia has attracted substantial international investment. This is due to its advantageous geographical location connecting the Asia-Europe markets, relatively low labor costs, and supportive policies. Singapore, Malaysia, and Vietnam have emerged as three key hubs in the Southeast Asian semiconductor industry, each developing unique industry clusters and strategic positions. This report provides an overview of the Southeast Asian semiconductor industry and explores the distribution of semiconductor clusters across these three countries.
