Abstracts

The report finds that the global IP camera industry's shipment volume witnessed an over 30% sequential growth and 9.5% year-on-year growth in the second quarter of 2017, owing to the decreased ASP (Average Selling Price) of IP camera solutions that spur the implementation of IP cameras. The industry's shipment volume is forecast to grow 10% year-on-year in the second half of 2017 and reach over 3 million units, bolstered by the rollout of new products and the expansion of new applications.
