Abstracts

The report finds shipment volume of the Taiwanese server system industry at full system and barebones levels, as well as at board level, declined sequentially but grew year-on-year in the first quarter of 2018 owing to the rollout of Intel's new processor. The overall server system industry is anticipated to have witnessed both sequential and year-on-year growth in the second quarter of 2018. Furthermore, the overall industry performance in 2019 is likely to be benefited by Intel's new CPU rollout in second half of 2018.
