Abstracts

COVID-19 has accelerated the development of intelligent video analytics solutions such as thermal screening, face mask detection, and crowd analysis. The global evolution of smart cities which use image data to improve city governance also spurs the replacement demand of IP cameras and the need for introducing AI-based image recognition solutions. As the worldwide video surveillance market is expected to reach US\$49 million in 2025, this report has looked into the demand, product, and the U.S. ban to identify the trends in the worldwide video surveillance market.
