Abstracts

The report finds that the global notebook PC shipment volume topped 249 million units in 2021, up 24.3% compared to 2010. Due to the increase in vaccine coverage and the return-to-the-office in European and US markets, the demand for commercial notebook PCs has recovered since the second half of 2021. This report provides an overview of global PC and notebook PC volume forecast for the period 2022-2026 with breakdowns by region, panel size, and CPU type/platform.
