Abstracts

The report finds that global server shipment volume grew 4.5% year-on-year in 2021, reaching nearly 13 million units. Based on MIC's findings, the continued demand for data centers by U.S. and Chinese brands have bolstered global server shipments in 2022. As a result, global sever shipment volume is anticipated to have reached 13.6 million units in 2022, up 5.2% year-on-year. This report provides server shipment volume forecasts from 2023 to 2026 and server quarterly performance from 1Q 2021 to 4Q 2022; server shipment volume by region and by CPU architecture with analyst insights.
