Abstracts

Convergent technologies in the areas of 5G, Industrial IoT, Smart Infrastructure, Unstructured (Big) Data, IoT Data and Analytics are poised to transform everything from manufacturing to enterprise automation. The benefits to business and society as a whole are manifold including greater efficiencies, new and improved products and services, and greater flexibility such as products as a service.

Leveraging process automation and industrial data will provide analytics and intelligence, which will be manifest at the retail level as smart products and services that transform lifestyles, and deeply within business supply chains as product life cycle management is transformed by way of evolving IoT and Industry 4.0 technologies, processes, and procedures.

This research provides the most comprehensive evaluation available of the technologies, current market, and future prospects for 5G, Industrial IoT, Smart Infrastructure, Big Data, IoT Data Management and Analytics. It includes an assessment of challenges and opportunities, key players and solutions, and market forecasts for the period 2016 to 2021. This research package includes reports in the following industrial convergence areas:

Industrial IoT and 5G: Emerging Technologies, Solutions, Market Outlook and Forecasts

Industrial Internet of Things (IIoT): Market Opportunities for Solutions, Products, and Services 2016 - 2021

IoT in Smart Infrastructure, Cities, and Buildings: Market Analysis and Forecasts 2016 - 2021

The Big Data Market: Business Case, Market Analysis & Forecasts 2016 - 2021

IoT Data Management and Analytics Market Outlook & Forecasts 2016 - 2021

Sensors and Intelligent End-point Devices in IoT: Market Analysis and Forecast 2016 - 2021

Bonus: Corporate Licenses will also receive 5G Market Assessment: Vendor Strategies, Technology and Infrastructure Outlook and Application Forecasts 2016 - 2025

All purchases of Mind Commerce reports includes time with an expert analyst who will help you link key findings in the report to the business issues you're addressing. This needs to be used within three months of purchasing the report.

Target Audience:

IoT vendors

Big Data vendors

Manufacturing companies

Telecom service providers

Telecom equipment providers

Global infrastructure suppliers

Communications component providers

Cloud services and datacenter companies

Smartgrid and energy management companies

Big data, analytics, and information processing companies

Sovereign investment funds, hedge funds and private equity

Report Benefits:

Forecasts for all convergent areas 2016 to 2021

Identify leading companies and solutions in each area

Learn how technologies interact and depend upon one another

Identity market challenges and opportunities for apps and services

Understand how efficiency improvements and enhancements impact business
