Abstracts

OVERVIEW:

The mission critical communications market is rapidly evolving as developing technologies provide solutions necessary to meet emerging demands for improved voice, data, and machine-oriented communications. Industry verticals that manage critical infrastructure (such as utilities, ports, and transportation) and services also require enhanced communications to safeguard assets and optimize operations.

This report assesses core public safety technology and solutions as well as emerging areas for mission critical communications including ultra-reliable low-latency communications for enterprise, industrial and government sectors. The report also provides analysis of supporting technologies for mission critical communications including 5G, AI, and IoT. The report also identifies market opportunities and outlook for mission critical communications, applications and solutions by industry vertical with forecasts for 2021 to 2028.

SELECT REPORT FINDINGS:

The global mission critical communication market will reach \$32.6 billion by 2028, growing with 9.8% CAGR through 2028

Military, public transportation, and smart grids are the largest industry verticals in the non-public safety critical communication market segment

The global AI powered IoT critical communication market in public safety will

approach \$20.6 billion by 2028, growing 17.8% CAGR during 2021 to 2028

Asia Pacific is the largest region with a 43.8% of the total mission critical communications market and the greatest opportunity for certain technologies

IoT in critical infrastructure is the largest segment with 52% of the total market with growth driven by the need for inter-system communications and AI integration

Other than cybersecurity for support of critical infrastructure, there is nothing more important to government and sovereign nation safety and security than critical communications

In conjunction with land mobile radio (LMR) modernization, and industry digitization for the public safety sector transition from LMR to 4G and beyond, LTE Advanced and 5G networks establish and support mission critical voice and data communications as well as facilitate opportunities for new mission critical applications.

While mission critical communications technology is often referred to synonymously with the public safety sector, the need for ultra-reliability, low-latency, and/or high bandwidth capabilities are also necessary for enterprise, industrial, and government sectors. Like public safety, solutions in the commercial arena are typically realized via dedicated networks for specific industries including the public safety sector, transportation (air, rail, road, and water), utilities, mining, manufacturing, and the oil & gas industry.

Looking beyond LTE, 5G provides essential support for mission critical communications in many ways including improved support for quality of service through various mechanisms including 5G network slicing as well as other technologies optimized for what is known as Ultra-Reliable Low-Latency Communications (URLLC). Thanks to URLLC capabilities, 5G will be a viable alternative to WiFi for indoor mission critical communications.

5G network slicing and URLLC capabilities will work in conjunction with edge computing in support of latency-sensitive apps and services for various enterprise, industrial and government use cases. The combination of 5G and edge computing is expected to reduce network latency significantly, which will enable many previously tethered-only applications to achieve greater operational flexibility, such as nomadic

implementation/operation or even mobility.

We see a few key technologies playing a key role in support of LTE and 5G, including Artificial Intelligence, big data analytics, and Internet of Things (IoT) solutions. The convergence of AI with IoT, known as the Artificial Intelligence of Things (or AIoT) is another important area as AI adds value to IoT through machine learning and decision making and IoT adds value to AI through connectivity and data exchange. The AIoT market constitutes solutions, applications, and services involving AI in IoT systems and IoT support of AI solutions.

The market for mission critical communications is rapidly moving beyond voice to encompass data, and machine-oriented communications. For example, the public safety community increasingly relies upon IP-based solutions for first responders (ambulance, police, fire) and dispatch communications as well as overall coordination in the event of a disaster.

Private IoT networks will also connect mission critical commercial operations, such as connecting infrastructure with monitoring and control, supported by AI and advanced data analytics. This will involve intelligent and connected systems that rely upon newly allocated 5G spectrum sharing management solutions for communications. Each of these technologies are evaluated in the report.

TARGET AUDIENCE:

AI and IoT vendors

System integrators

Public safety companies

Device and network providers

Government and policy makers

Infrastructure and essential services

REPORT BENEFITS:

Mission critical communications forecasts from 2021 to 2028

Understand core technologies for mission critical communications

Identify companies, strategies, and solutions for mission critical communications

Recognize the role and importance of key supporting technologies including AI, M2M and IoT data integration, and big data analytics

Understand the evolution of public safety LTE technology and how 5G will improve first responder and dispatch communications effectiveness

Identify the market opportunity for mission critical communications in enterprise, industrial and government sectors including public safety, military and homeland security

Understand the role and importance of 5G including massive IoT, substantial bandwidth improvements, enhanced SLS support via network slicing, and ultra-reliable low-latency communications

COMPANIES IN REPORT:

AGT International

Amazon

AT&T

Contents

1. EXECUTIVE SUMMARY

2. INTRODUCTION

3. PUBLIC SAFETY TECHNOLOGIES AND SOLUTIONS

3.1 Public Safety in Perspective

3.2 Public Safety Expectations

3.2.1 Real Time Access to Information

3.2.2 Anytime, Anywhere Connectivity

3.2.3 Increased Situational Awareness

3.3 Public Safety Objectives

3.3.1 Prevention

3.3.2 Detection

3.3.3 Mitigation

3.3.4 Investigation

3.4 Public Safety Infrastructure

3.4.1 Critical Control Systems

3.4.2 Critical Communication Networks

3.4.3 Surveillance and Identification

3.4.4 Emergency Disaster Management

3.5 Emergency Response and Control

3.5.1 Emergency Medical Services

3.5.2 Fire/Rescue

3.5.3 Law Enforcement

3.5.4 Responder Coordination

3.6 Current Technologies Supporting Public Safety

3.6.1 Public Safety Answer Points

3.6.2 Geographic Information Systems

3.6.3 Enhanced Wireless 9-1-1

3.6.4 Indoor Location Systems

3.6.5 LMR for Public Safety Communications

3.6.6 LTE for Public Safety Communications

3.6.7 Lawful Intercept/CALEA

4. 5G TECHNOLOGY AND SOLUTIONS

- 4.1 5G Equipment and Network Operation
 - 4.1.1 LTE Foundation, Device Ecosystem, LAA, and 5G Readiness
 - 4.1.2 Spectrum Sharing and Utilization
 - 4.1.3 Narrowband 5G for Massive IoT
 - 4.1.4 Multi Connectivity Architecture with Small Cell Deployment
 - 4.1.5 Relevance of Mobile IoT Technology: NB-IoT and eMTC
 - 4.1.6 OSS/BSS Architecture for 5G Service Operation
 - 4.1.7 Multi-Antenna and Beamforming Impact
 - 4.1.8 5G Network Slicing
 - 4.1.9 Continuation of LTE in Post-5G Era
 - 4.1.10 Service Design, ROI and 5G Network
- 4.2 5G Technology and Network Impacts
 - 4.2.1 Network Coverage and Efficiency
 - 4.2.2 Network Spectrum Efficiency
 - 4.2.3 Data Throughput
 - 4.2.4 Connection Density
 - 4.2.5 UR-LLC (Ultra-Reliable Low Latency Communication)
 - 4.2.6 Network Energy Usage
 - 4.2.7 Improved Battery Life
 - 4.2.8 Improved Flexibility in Air Interface and Versatility
 - 4.2.9 Massive MIMO
 - 4.2.10 mmWave Technology
 - 4.2.11 Integration of Access and Backhaul
 - 4.2.12 D2D Communication
 - 4.2.13 Flexible Duplex: FDD and TDD
 - 4.2.14 Multi-Antenna Transmission Scenario
 - 4.2.15 Decoupling User Data from Control System
- 4.3 5G Technology and Network Architecture
 - 4.3.1 Massive MIMO and Beamforming
 - 4.3.2 Cloud RAN
 - 4.3.3 Broadband Spectrum and Satellite
 - 4.3.4 5G New Radio (NR)
 - 4.3.5 Software Defined Air Interface
 - 4.3.6 Network Function Virtualization (NFV)
 - 4.3.7 Self Organizing Network (SON) and Self Healing Network (SHN)
 - 4.3.8 HetNet and H-CRAN
 - 4.3.9 Large-Scale Cooperative Spatial Signal Processing (LS-CSSP)
 - 4.3.10 Software Defined Radio (SDR)
 - 4.3.11 Visible Light Communications (VLCs)

- 4.3.12 Cross Layer Controller
- 4.3.13 Cognitive Radios (CRs) and Transmission Technologies
- 4.3.14 Scalable OFDM and Subcarrier Spacing
- 4.4 5G Network Implementation
 - 4.4.1 Base Stations
 - 4.4.2 Small Cells
 - 4.4.3 Macro Cells
 - 4.4.4 Baseband Units and RF Units
 - 4.4.5 Mobile Core
 - 4.4.6 Remote Radio Heads
 - 4.4.7 Front-haul and Backhaul Networks
- 4.5 LTE Advanced, LTE Pro, and Beyond Supported Solutions
 - 4.5.1 Mobile IoT and M2M Communication
 - 4.5.2 Broadcast Services and Immersive Entertainment
 - 4.5.3 Vehicular Communication
 - 4.5.4 Public Safety Network
 - 4.5.5 Smart City Applications
 - 4.5.6 Private Enterprise Network

5. AI TECHNOLOGY AND ECOSYSTEM ANALYSIS

- 5.1 AI Technology Matrix
 - 5.1.1 Machine Learning
 - 5.1.1.1 Deep Learning
 - 5.1.1.2 Supervised vs. Unsupervised Learning
 - 5.1.1.3 Reinforcement Learning
 - 5.1.2 Natural Language Processing
 - 5.1.3 Computer Vision
 - 5.1.4 Speech Recognition
 - 5.1.5 Context Aware Processing
 - 5.1.6 Artificial Neural Network
 - 5.1.7 Predictive APIs
 - 5.1.8 Autonomous Robotics
- 5.2 AI Technology Readiness
- 5.3 Machine Learning APIs
 - 5.3.1 IBM Watson API
 - 5.3.2 Microsoft Azure Machine Learning API
 - 5.3.3 Google Prediction API
 - 5.3.4 Amazon Machine Learning API

- 5.3.5 BigML
- 5.3.6 AT&T Speech API
- 5.3.7 Wit.ai
- 5.3.8 AlchemyAPI
- 5.3.9 Diffbot
- 5.3.10 PredictionIO
- 5.3.11 General Application Environment
- 5.4 AI Technology Goals
- 5.5 AI Tools and Approaches
- 5.6 AI in Emotion Detection
 - 5.6.1 Facial Detection APIs
 - 5.6.2 Text Recognition APIs
 - 5.6.3 Speech Recognition APIs
- 5.7 IoT Application and Big Data Analytics
- 5.8 Data Science and Predictive Analytics
- 5.9 Edge Computing and 5G Network
- 5.10 Cloud Computing and Machine Learning
- 5.11 Smart Machine and Virtual Twinning
- 5.12 Factory Automation and Industry 4.0
- 5.13 Building Automation and Smart Workplace
- 5.14 Cloud Robotics and Public Security
- 5.15 Self Driven Network and Domain Specific Network
- 5.16 Predictive 3D Design

6. IOT TECHNOLOGY AND VALUE CHAIN ANALYSIS

- 6.1 IoT Semiconductor Building Blocks
 - 6.1.1 Wireless Sensors
 - 6.1.2 IoT Processors
 - 6.1.3 Gateways
 - 6.1.4 Applications
- 6.2 IoT Chipsets
- 6.3 Network Technology and Protocols
- 6.4 Real Time Operating System (RTOS)
 - 6.4.1 Open Source RTOS
 - 6.4.2 Commercial RTOS
 - 6.4.3 Distributed Stream Computing Platforms (DSCPs)
- 6.5 IoT Software and Platforms
 - 6.5.1 IoT Analytics

- 6.5.2 IoT Security
- 6.5.3 IoT Device Management
- 6.5.4 IoT Standard and API Interoperability
- 6.6 IoT Industry Applications
- 6.7 Value Chain Analysis
 - 6.7.1 IoT Hardware Device Provider
 - 6.7.2 IoT Component Provider
 - 6.7.3 IoT Platform Provider
 - 6.7.4 IoT Software and Service Provider
- 6.8 IoT Investment and Market Alliances
- 6.9 Role of Mobile Network Operators
- 6.10 IoT and Next Generation Public Safety
 - 6.10.1 IoT and Public Safety Opportunity Areas
 - 6.10.2 Integrating IoT with Public Safety Communications
 - 6.10.3 Integrating IoT and Direction Communications

7. CRITICAL COMMUNICATION FOR PUBLIC SAFETY AND ENTERPRISES

- 7.1 Deployment Status
- 7.2 3GPP-Defined Critical Communications
 - 7.2.1 Mission Critical Push to Talk (MCPTT)
 - 7.2.2 MCX (Mission-Critical PTT, Video & Data)
 - 7.2.3 Isolated LTE Operation for Public Safety (IOPS)
 - 7.2.4 High Power User Equipment (HPUE)
- 7.3 IoT to Improve Public Safety
- 7.4 Ultra-Reliable Low Latency Communications or URLLC
- 7.5 Comparison of 5G with WiFi Version 6 (WiFi6)

8. CRITICAL COMMUNICATION MARKET ANALYSIS AND FORECASTS

- 8.1 Global Critical Communication Market 2021 – 2028
 - 8.1.1 Critical Communications Managed Service Market
 - 8.1.2 Critical Communication Market by Segment
 - 8.1.2.1 Critical Communication Market by IoT Critical Infrastructure
 - 8.1.2.2 Critical Communication Market by Public Safety Communication Technology
 - 8.1.2.2.1 Critical Communication Market by Licensed LMR Standard
 - 8.1.2.2.2 Critical Communication Market by DMR Standard
 - 8.1.2.2.3 Critical Communication Market by Licensed LMR Type
 - 8.1.2.2.4 Critical Communication Market by Commercial LMRs Frequency

- 8.1.2.2.5 Critical Communication Market by Public Safety LTE Standard
- 8.1.2.2.6 Critical Communication Market by Public Safety LTE Type
- 8.1.2.3 Critical Communication Market by Professional Service
- 8.1.3 Critical Communication Market by Public Safety Industry Vertical
 - 8.1.3.1 Critical Communication Market by Military Application
 - 8.1.3.2 Critical Communication Market by Public Transportation Application
 - 8.1.3.3 Critical Communication Market by Utilities and Smart Grid Application
- 8.1.4 AI Powered IoT Critical Communication Market in Public Safety
 - 8.1.4.1 AI Powered IoT Critical Communication Market by Segment
 - 8.1.4.2 AI Powered IoT Critical Communication Market by AI Technology
- 8.2 Regional Critical Communication Market 2021 – 2028
 - 8.2.1 Critical Communication Market by Region
 - 8.2.2 APAC Critical Communication Market by IoT Critical Infrastructure, Public Safety Communication, Professional Service, AI Technology, and Country
 - 8.2.3 North America Critical Communication Market by IoT Critical Infrastructure, Public Safety Communication, Professional Service, AI Technology, and Country
 - 8.2.4 Europe Critical Communication Market by IoT Critical Infrastructure, Public Safety Communication, Professional Service, AI Technology, and Country
 - 8.2.5 Latin America Critical Communication Market by IoT Critical Infrastructure, Public Safety Communication, Professional Service, AI Technology, and Country
 - 8.2.6 Middle East and Africa Critical Communication Market by IoT Critical Infrastructure, Public Safety Communication, Professional Service, AI Technology, and Country

9. MISSION CRITICAL COMPANY ANALYSIS

- 9.1 AGT International
- 9.2 Atos SE
- 9.3 Cisco Systems
- 9.4 Dataminr
- 9.5 Enforsys
- 9.6 ESRI
- 9.7 General Dynamics Corporation
- 9.8 L3Harris Technologies
- 9.9 Hexagon
- 9.10 Hitachi Vantara
- 9.11 Honeywell International
- 9.12 Huawei Technologies
- 9.13 IBM

- 9.14 Ericsson
- 9.15 Motorola Solutions
- 9.16 NEC Corporation
- 9.17 Nice Systems
- 9.18 Nokia Corporation
- 9.19 Northrop Grumman Corporation
- 9.20 RapidSOS
- 9.21 SAP SE
- 9.22 SAS
- 9.23 Sonim Technologies
- 9.24 Tyler Technologies
- 9.25 FirstNet
- 9.26 Verizon
- 9.27 AT&T
- 9.28 Red Box Recorders Ltd.
- 9.29 iNet Public Safety
- 9.30 Codan Communications
- 9.31 Intellitech Corporation
- 9.32 Parallel Wireless
- 9.33 Twilio
- 9.34 Intersec
- 9.35 Bandwidth
- 9.36 Intrado
- 9.37 Comtech

10. MISSION CRITICAL COMPANY CASE STUDIES

- 10.1 AT&T
 - 10.1.1 Company Background
 - 10.1.2 Product Portfolio
 - 10.1.3 Recent Developments
- 10.2 Motorola Solutions
 - 10.2.1 Company Background
 - 10.2.2 Product Portfolio
 - 10.2.3 Recent Developments
- 10.3 Nokia
 - 10.3.1 Company Background
 - 10.3.2 Product Portfolio

11. CRITICAL COMMUNICATION CASE STUDIES

11.1 Modernizing Public Safety Applications and Services

11.2 5G Connected Ambulances

11.3 Intelligent, Multiservice, and Ultra-Broadband Network Architecture

11.4 Tsunami Preparedness with Connected Drones

11.5 Emergency Communications Platforms

12. CONCLUSIONS AND RECOMMENDATIONS

12.1 Public Safety Sector

12.2 Enterprise and Industrial Sectors

13. APPENDIX: CRITICAL COMMUNICATIONS INFRASTRUCTURE, LTE AND 5G IN INDUSTRIAL VERTICALS

13.1 Mission Critical Communications Infrastructure Market

13.1.1 Mission Critical Communications by Equipment, Software, and Service

13.1.2 Mission Critical Communications Infrastructure by Platform Type

13.2 LTE and 5G Critical Communications Market

13.2.1 Critical Communication Applications 2021 – 2028

13.2.2 Critical Communications by Major Market Segment 2021 – 2028

13.3 5G New Radio in Industrial Critical Communications

13.3.1 5G NR Applications in Industrial Automation 2021 – 2028

13.3.2 5G NR Applications by Deployment Type 2021 – 2028

13.3.3 Industrial Automation Market in Private 5G NR 2021 – 2028

13.3.4 Private 5G NR in Industrial Automation by Application 2021 – 2028

13.4 5G Ultra-reliable Low Latency Communications Critical Communications

13.5 North America

13.6 Europe

13.7 Asia Pacific

13.8 Latin America

13.9 Middle East and Africa

I would like to order

Product name: Mission Critical Communications Market for Voice, Data, and M2M in Public Safety, Enterprise, Industrial and Government Sectors 2021 – 2028

Product link: <https://marketpublishers.com/r/MC54C28CED39EN.html>

Price: US\$ 3,500.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/MC54C28CED39EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name:
Last name:
Email:
Company:
Address:
City:
Zip code:
Country:
