Abstracts

Overview:

Through many acquisitions in the ICT and digital media space, Oracle is positioning itself to be a preferred provider of the core technologies for cloud computing, communications, content, commerce and applications. The company is also leveraging its data management experience and expanding its Cloud Computing service with its Data as a Service (DaaS) offering.

DaaS is defined as any service offered wherein users can access vendor provided databases to utilize data in a Cloud-based service environment. DaaS is expected to grow significantly in the near future due to a few dominant themes including cloud-based infrastructure/services, enterprise data syndication, and the consumer services trend towards Everything as a Service (XaaS).

This research evaluates the DaaS market opportunity with a focus on anticipated industry leader, Oracle. The report analyzes Oracle's strategy, opportunities, and outlook. All purchases of Mind Commerce reports includes time with an expert analyst who will help you link key findings in the report to the business issues you're addressing. This needs to be used within three months of purchasing the report.

Target Audience:

Telecom service providers

Data integration companies

Big Data and Analytics companies
