Date: June 2016

Pages: 201

Price: US\$ 2,995.00 (Single User License)

ID: W71BE830DD6EN

Abstracts

Wearable Technology and Digital Healthcare represent two dominant trends that are poised to redefine virtually everything about how health products and services are delivered and supported. Ranging from telemedicine to self-monitoring and diagnosis, wearable devices and the Internet of Things (IoT) will start as a novelty and achieve necessity status as insurance company cost optimization become the main driver for adoption and usage.

This research evaluates the current state of the wearable technology ecosystem including devices, applications, and industry segments. It addresses wearables in consumer and business, key challenges, market players, and solutions. It also provides an outlook for the future of wearable technology and forecasts for the period 2016 - 2021.

This research also provides an in-depth assessment of the global IoT healthcare market including growth drivers, value chain, vendor analysis, and quantitative assessment of the industry from 2016 to 2021. All purchases of Mind Commerce reports includes time with an expert analyst who will help you link key findings in the report to the business issues you're addressing. This needs to be used within three months of purchasing the report.

Target Audience:

Wireless service providers

Wireless device manufacturers

Healthcare technology suppliers

Application developers and app stores

Regulators and governmental agencies

IoT infrastructure and service providers

Anyone focused on the healthcare industry
