Market growth drivers and challengesSince the COVID-19 virus outbreak in December
2019, the disease has spread to almost 100 countries around the globe with the World
Health Organization declaring it a public health emergency. The global impacts of the
coronavirus disease 2019 (COVID-19) are already starting to be felt, and will
significantly affect the Ammonium Near-infrared Spectroscopy market in
2020. COVID-19 can affect the global economy in three main ways: by directly affecting
production and demand, by creating supply chain and market disruption, and by its
financial impact on firms and financial markets. The outbreak of COVID-19 has brought
effects on many aspects, like flight cancellations; travel bans and quarantines;
restaurants closed; all indoor events restricted; over forty countries state of emergency
declared; massive slowing of the supply chain; stock market volatility; falling business

confidence, growing panic among the population, and uncertainty about future. This report also analyses the impact of Coronavirus COVID-19 on the Near-infrared Spectroscopy industry.
