Abstracts

The main part of the vertical CNC milling machine is mainly composed of base, column, saddle, worktable, spindle box and other components. The five main parts of the main body are all made of high-strength and high-quality castings and resin sand molding, and the organization is stable to ensure that the whole machine has good rigidity and precision retention. The three-axis guide rail pair adopts a combination of high-frequency quenching and plastic-coated guide rails to ensure the running accuracy of the machine tool and reduce frictional resistance and loss. The three-axis transmission system is composed of precision ball screws and servo system motors, and is equipped with automatic lubrication devices.
