Abstracts

Acrylonitrile Styrene Acrylate Resin is a kind of impact modified resin, which is made of styrene, acrylonitrile and acrylic rubber. It has good mechanical and physical properties. ASA and ABS are similar in structure and are composed of acrylonitrile and butadiene rubber. It retains the excellent mechanical and physical properties of ABS as engineering plastics. ASA has strong weather resistance and good high temperature resistance. In addition, ASA is an anti-static material, which can make the surface less dust.
