Abstracts

Admissions and enrollment software handles most or all of the administrative aspects of attracting students to a school and enrolling them into the institution. This software can be utilized by both private K-12 schools, as well as colleges and universities. These systems have traditionally handled admissions logistics such as information processing, student accomplishments, and demographic information. However, they have recently expanded to serve more unique use cases, such as schools with lottery systems, tuition requirements, or more strenuous application processes.

This report contains market size and forecasts of Admissions and Enrollment Software in Global, including the following market information:
