Abstracts

Adventure motorcycles are motorcycles that ride reasonably well on paved roads and also on non-paved roads. This motorcycle needs to have a strong frame and sub-frame to be able to carry a passenger and/or travel gear. This motorcycle will need a reasonable tank size, commensurate to its fuel consumption so you ride some 200 miles before needing a refuel. This motorcycle needs to be reasonably reliable, requiring limited maintenance and be easily serviceable. More suspension, beefier frames, crash bars, larger tank sizes, mean that in general adventure bikes will be heavier than a non-adventure version of a similar motorcycle.
