It is focus on multi-process automatic CNC machine tools in aerospace industry, which includes CNC Lathe, CNC Milling Machine, CNC Grinding Machine and Others. CNC is the short form for Computer Numerical control. We have seen that the NC machine works as per the program of instructions fed into the controller unit of the machine. The CNC machine comprises of the mini computer or the microcomputer that acts as the controller unit of the machine. While in the NC machine the program is fed into the punch cards, in CNC machines the program of instructions is fed directly into the computer via a small board similar to the traditional keyboard.
