Abstracts

The Air Negative Ion Generator uses high-pressure corona to increase the negative ion content in the air, thereby improving the air quality and promoting good health. It is known as the air 'vitamin'. Medical clinical practice has proven that it is on the respiratory system. Diseases such as the circulatory system and nerves have adjuvant effects and are widely used in the life and medical fields. This is a high-efficiency open-type negative ion generator. It adopts thyristor inverter high-voltage, floating discharge needle, which has simple structure, good effect, safety and reliability. The mains voltage can work normally from 160V to 250V, and the consumption of the electrode is only about 1W, so it can work continuously for a long time.
