Automatic Number Plate Recognition (ANPR) or Automatic License Plate Recognition (ALPR) cameras, also known as License Plate Capture (LPC) cameras, is a specialized form security camera. As their name implies, their job is to capture and record license plate numbers from vehicles in motion; they are also certainly capable of capturing stationary plates as well. While other cameras may be able to do the job under the right circumstances, LPR cameras are the only security cameras that guarantee and accurate recording of a license plate.
