Abstracts

Alzheimer's is a neurodegenerative progressive disease. Alzheimer's disease is a type of dementia which includes a broad group of brain diseases such as problems with memory, thinking and behavior for the long term. It is a type of dementia and near about 60-70% of Alzheimer's disease is the cause of dementia. Many researchers consider an increase in the level of protein amyloid in the brain is one of the causes of Alzheimer disease. Older age is the prominent cause of Alzheimer's whereas there are also some genetic and some other causes of Alzheimer diseases. The exact cause of Alzheimer's disease is still unknown.
