Abstracts

Anchor handling tug supply vessels are specially designed to handle anchors for oil rigs, tow ships to location, anchor ships and oil rigs, and serve as an emergency response and rescue vessel. The increasing number of offshore oil rigs is one of the primary factors driving the growth of this market globally. Oil rigs are offshore oil platforms that facilitate the drilling of wells for exploration and production activities. The increasing drilling of offshore oil and gas reserves will lead to a rise in the number of AHTS vessels. Moreover, the maturing onshore oil reserves in the North Sea and the Gulf of Mexico will also result in an augmented demand for AHTS vessels.
