## Abstracts

Apple Cider Vinegar Gummies are gummy-edible dietary supplements containing a particular amount of ACV. Some brands may contain vital organic ingredients like vitamins, minerals, and plant extracts. The purpose of ACV gummies is to provide a more convenient way to ingest ACV, a rather bitter-tasting substance. Additionally, unlike raw ACV, certain candies may contain extra calories and a sweetener such as an artificial or natural sweet flavoring or an artificial sweetener. Although most brands' sugar and calorie content aren't excessive, it may be a deal-breaker for some people with low-calorie intake goals. Furthermore, some brands lack the beneficial bacteria found in Apple Cider Vinegar's "mother[2]," resulting in diminished benefits. The mother is a proprietary blend of bacteria and vinegar made into a probiotic type of mixture rich in nutrients. It's worth noting that most ACV research is on raw vinegar, and there is minimal research on the advantages of ACV in gummies, powdered, tablet, or capsule form.
