AV Fistula Needle is a connection of artery to vein. The arteriovenous fistula needle is recommended as the first choice for hemodialysis. Arteriovenous fistula needles are used in conjunction with a connector of hemodialysis blood tubing set. These needles connect blood lines to the blood vessel through during dialysis procedure via an internal fistula. Health care providers recommend an arteriovenous fistula needle due to its good blood flow for dialysis, long lasting than other types of access, safety and less possibility of getting infected and blood clotting.
