Abstracts

The majority of auto makers are executing these thoughts into the parts of their designs and the interior is no exception. Consumers are opting for bio-based materials, instead of plastic composite material parts. A shift towards light colors in car interiors and light weight luxury automobiles are becoming increasingly popular. There is a need to reduce the energy utilized during manufacture, the wastage produced and the energy and resources used to fabricate the parts. Lately there has been a shift in the industry towards renewable materials, recycled and sustainable production.
