Abstracts

Heavy load on manual workforce due to increase rush of packing diversified products may lead to unavoidable errors and mistakes. Thus, the adoption and deployment of various small-scale and large-scale types of machinery will help companies to attain their goals and tasks more efficiently.

Packaging equipment refers to the many types of equipment used in the process of protecting products and materials. This is often for storage, sale, and distribution. This process is used to speed up the process for packing and shipping while reducing labor costs for companies. Often times, packaging equipment can be referred to as packaging machinery.

Packaging machinery is used throughout all packaging operations, involving primary packages to distribution packs. This includes many packaging processes: fabrication, cleaning, filling, sealing, combining, labeling, overwrapping, palletizing.

E-commerce (electronic commerce) is the buying and selling of goods and services, or the transmitting of funds or data, over an electronic network, primarily the internet. These business transactions occur either as business-to-business (B2B), business-to-consumer (B2C), consumer-to-consumer or consumer-to-business.

The Automated E-Commerce Packaging industry can be broken down into several segments, Fully-automated, Semi-automated, Services, etc.

Across the world, the major players cover West Rock, Sealed Air, Pregis, Sparck Technologies, Maripak, Sparck Technologies, CMC Machinery, Packsize, Panotec, etc.
