Abstracts

Automated packaging systems are machines used for packing items to reduce manual labor and minimize handling time and cost. These machines can be categorized into two types, namely, fully-automated, where all activities such as box erection, folding, sealing, and labeling are performed by the system, and semi-automated, where only one activity or a combination of a few activities mentioned above is performed by the system. The global automation packaging industry has grown over the past 2–3 years, with product packaging being performed by robots or machines, thereby reducing product damage, cost, and manual labor. Products are typically packaged in boxes and pouches depending on the item type and weight. Box packaging (of corrugated sheets) is gaining popularity among end-users.

This report contains market size and forecasts of Automated Packaging System for E-commerce in global, including the following market information:

Global Automated Packaging System for E-commerce Market Revenue, 2017-2022, 2023-2028, ($ millions)

Global Automated Packaging System for E-commerce Market Sales, 2017-2022, 2023-2028, (K Units)

Global top five Automated Packaging System for E-commerce companies in 2021 (%)

The global Automated Packaging System for E-commerce market was valued at million in 2021 and is projected to reach US$ million by 2028, at a CAGR of % during the forecast period 2022-2028.
