Abstracts

Automatic Colorimeter is a compact and easy-to-operate absorbance (OD) light colorimeter analytical instrument. It is a unique system that combines convenience with the accuracy and precision of analysis. The instrument includes various filters covering wavelengths 400-700 nm in the form of built-in 9 filters. Filter settings are controlled by a rotary dial. Provides built-in shutter control to avoid photodiode fatigue. When the instrument is turned on, the lamp glows and the light travels through the solution to the detector, where the absorbance or %T measurement is made.
