Abstracts

Automatic hand dryers are operated automatically when hands are placed a few inches below the infrared sensor. These touchless hand dryers do not have to have your hands placed on the hand dryer to be turned on automatically. Auto hand dryers are a necessity for any touch free washroom. Some hand dryers will turn on and run for 30 seconds, but most automatic and infrared hand dryers will turn off as quick as they came on when your hands have finished drying and are removed from the view of the sensor.
