Abstracts

The genuine leather is made by tanning of animal skin and rawhide. Leather also has a wide material resource, including cowhide, buffalo hide, hog skin, goat and sheep skin, deer skin, and other large amount origins of animal skins. Real leather gives an aura of luxury and prestige. Because no two animal hides are exactly the same, each piece of authentic leather has unique natural characteristics. The leather becomes softer and more attractive over time, which makes it more comfortable. Leather also has a soft, yet strong texture, making it hard-wearing. Many real leather products are also treated to help prevent stains. Leather is easy to take care of when maintained properly; it only needs a regular wiping with a clean, damp cloth. Genuine leather is a popular choice for furniture, car interiors.
