Automotive-grade pearlescent material is a pearlescent material with high weather resistance achieved through multi-layer coating technology and special surface treatment process. The automotive-grade pearlescent material has extremely high optical refractive index, pearlescent effect and viewing angle flashing effect. It has passed the rigorous artificial aging test, paint film adhesion, cross-cut knife detection and other procedures, and has the advantages of moisture resistance, high temperature resistance, corrosion resistance, etc. High weather resistance and environmental protection performance, mainly used in automotive coatings (automotive original OEM paint, high-grade refinish paint), exterior wall coatings, other weather-resistant coatings (metal fluorocarbon paint, coil paint, etc.).
