Autonomous Cars Chip market fall into four categories. The first is microcontrollers for traditional automotive features like emissions control and antilock brakes, an arena dominated by NXP and Renesas. Second are the wireless modem chips connecting cars to the internet, with Intel and Qualcomm as the big players. Then there are two categories for autonomous features: chips for the cameras and sensors that give a self-driving car 'eyes,' and the processing chips that serve as the artificial 'brains.' Mobileye is a big player on the sensor side, while Intel and Nvidia power AI features for companies like Waymo and Tesla.
