Abstracts

Autonomous and semi-autonomous tractors are a ground-breaking innovation for the agricultural sector. This innovation is anticipated to boost agricultural produce with minimal labor cost engagement. Autonomous and semi-autonomous tractors minimize the human effort required in farm processes such as harvesting, seed sowing, fertilization, and scarifying. Semi-autonomous tractors reduce human effort by assisting the driver in certain actions, while autonomous tractors are fully, driverless tractors, which completely replace the driver with several software and hardware components.
