## Abstracts

Baby monitor, also called baby monitor English translation for the baby monitor, belong to the wireless home security system, by the supervision unit (also known as monitoring end or baby end) and display (also become control terminal or parents) of two parts, the nursing unit is placed in the baby's room, which can display monitor at any time to the baby's safety. As a kind of family security product, the baby monitor provides real-time monitoring of every move, every word and every action of the baby by using the monitoring end. The monitoring result is sent to the control end device in the hand of the guardian through the radio wave of analog signal or digital signal, and can be restored into video or audio. By using a baby monitor, parents or guardians no longer need to be at the baby's or child's side to keep track of their behavior, and avoid frequent checking to affect the baby's rest, and can detect and deal with any abnormality at the same time.
