Synthetic paper, from its early development and historical evolution, has typically been manufactured using synthetic resin derived from petroleum as its primary material. Naturally, this has given it characteristics similar to those of plastic film, but its appearance is remarkably similar to that of regular paper made from wood pulp. In addition, many synthetic papers have properties similar to those of regular paper. BOPP Synthetic Paper is Biaxial Oriented Polypropylene Synthetic Paper. There are two type of Synthetic Paper: BOPP and HDPE.
