Bleaching Chemicals are usually based on peroxides which do not contain chlorine such as sodium percarbonate, hydrogen peroxide, and sodium perborate. Bleaching chemicals are industrially as well as domestically used for, whitening clothes and removing stains from textiles. Bleaching chemicals are as well used in the pulp and paper industry for the bleaching of wood pulp used in making paper. Bleaching chemicals are also used in horticulture for killing weeds, removing mildew and increasing longevity of cut flowers. Bleaching agents function by interacting with many organic chemical compounds to turn them colorless.
