Abstracts

Blemish Balm in 'BB Cream' can stand for a few different things (blemish balm, blemish base, beauty balm, to name a few), but the best BB creams generally all have similar functions. BB creams can be used as foundation, moisturiser and a sunblock skincare product all in one. Not to be confused with CC creams (colour control/colour correction cream) which is generally used to decrease skin redness, sallowness or improve an uneven skin tone. It's important to know the difference between the two when it comes to bb cream vs cc cream, as the two generally have different uses.
