Abstracts

Bundling stretch film also called banding stretch film or bundling stretch wrap can be used to fix small items together, and can save time and money replacing heavier and more expensive packaging products. Bundling wrap can replace the use of tape and twine to packaging small items together. Unlike tapes bundling stretch film will not stick to the product or leave residue.

The main difference between bundling stretch film and traditional hand or machine stretch film is the roll size. Hand and machine stretch film rolls are often offered in widths between 10-20 inches. Bundling stretch film rolls are offered in widths from 1-5 inches.

This report contains market size and forecasts of Bundling Stretch Wrap in global, including the following market information:
